Who's Snoring Now

by

Reggie Binns, RPSGT
Travis Gober

Narrator: Larry Helmick

Characters: Cody played by Cody Binns
Travis played by Travis Gober,
Jimmy played by James Roubos
Patient played by Justin Kilgore

Narrator: In the sleep lab, patients are greeted, hooked up and put to bed. The scene is in the tech room. With Travis sitting in front of the monitor, and Cody filling out the tech paperwork.

Character name-Travis: Hey dude its been a long day! I am dying. This is going to be a long night.

Character Name Cody : I hear you. It seems to get longer just hearing these patients snore. Well maybe we'll get some excitement. See something interesting

Travis: Yeah! Maybe one of the patients will wake up and study me!

Cody: They might as well. At least they will stay awake!

Travis: Why I don't do a good enough job in my sleep!

Cody: I didn't say that!

Travis: Hey I can sleep and do my job I'm so good!

Cody: You expect me to believe that from a person who can't walk and chew gum, let alone sleep and breathe at the same time.

Narrator: Travis goes into the pt room to check on a loose electrode. While chewing gum and walking he trips and falls on to the patient...

Travis: Sorry thought you may need company.

Patient: I wont tell if you wont!....(with a smirk)...The patient falls back to sleep.

Narrator: The patients are all sound asleep in the bedrooms all of them are actually snoring in sequence.

Travis: Listen it's a regular concerto.

Cody: Yeah your a veritable Beethoven!

Travis: Hey I have plenty years of practice!

Cody: Doing what sleeping or snoring!

Travis: Both at the same time.....

Cody: Yeah....while doing studies! What Ever Rip Van Winkle!

Narrator: Travis has no reply .His feet are up on the desk and fast asleep. He too is snoring in sequence!

Cody: Being a Sleep Tech seems to be giving me a sleep disorder.

Narrator: Travis is (waking up suddenly he seems very disoriented)....

Travis: Yeah disorderedhmmm!!! techI wasn't sleeping....

Cody: (laughing) Yeah you were just resting your eyes.....snoring was just to fit in!

Travis: Ok all joking a side, how are our three guests?

Narrator: In the tech room, Cody is in front of two computers, while Travis is in front of one computer. They are taking notes and discussing the patients. A call comes in from another technician. (Call placed on speaker phone).

Travis: Hello ... Sleep lab...

Jimmy: Hey this is Jimmy I am having a problem. The main unit keeps powering down! What do you think is going on?

Travis: Well do you have it plugged in?

Jimmy: Yeah ... what am I new?

Travis: Well must I answer that? No really, is the unit plugged into the socket. If so does the light switch control the plug?

Jimmy: Ok hold on..... yes that was the problem....didn't think of that first. Thanks I will get back to the study. I guess it's good to have that much experience to call upon.

Travis: Most other companies wouldn't have that knowledge or ability.....well the more I think about it most other companies couldn't find their main unit with both hands!

Cody: Let alone their acquisitions!
(*Everyone laughs*) *call ends.*

Cody: Ok back to our night.....

Narrator: Cody and Travis get back to notes and discussion of the patients pathology.....

Cody: Wow! Who would have ever guessed.....Snoring and Obstructive Sleep Apnea would be the in vogue topic.

Narrator: Will Cody and Travis ever get through this night? Please log in next month to see how this turns out!
